

Bawdsey Radar Museum Woodbridge

Come and be a Bawdsey Boffin! Grab your lab coat, a magnet and your Boffin trail sheet (provided).

Bawdsey Radar Transmitter Block is where Boffins, another name for scientists, developed operational radar that helped win the Battle of Britain.

This brilliant technology meant that the RAF could have their pilots and aircraft in the sky at the right time, in the right place.

The Transmitter Block is the first-ever radar station in the world and tells the story of the women and men who made it all happen.

The displays and interactive exhibition tells this story in an accessible and engaging way.

The Boffin Trail encourages children and families to find out more about the radar story and the people behind it.

Learning Credits

- 2 hours of CU Learning will be awarded on completion of The BoffinTrail.
