

[The Tide Mill Living Museum](#)  
[Woodbridge](#)

Only one of a handful in the World still producing flour on a regular basis and among the first tide mills in the country, working on the same site for well over 80 years.

Friendly child wardens will guide you around a host of interactive activities, unique computer-generated imagery and children's activities to help you discover how the grain and ultimately the flour move around the Mill.

Most days you can even see the huge oak water wheel turning.

Learn about the action of the tides, about huge and ancient machines, and help us to make our special stone-ground flour.

**Learning Credits**

- CU Learners will be awarded 1 hour of CU Learning for each visit.
